

bcbMonitor 4.0[®]

Automotive Sector

The automotive industry is one of the most important economic sectors in the world. Quality standards are increasingly high, along with the production demand.

The portfolio of tools that **bcbMonitor 4.0[®]** integrates, makes it a valuable resource for the Automotive Industry, allowing you to optimize your processes by continuously monitoring and with the option to be designed and adapted to your applications.

- Robust industrial controller with redundancy option

Official dealer & integrator

TELEDYNE FLIR
Everywhere you look

Automotriz

Testing

- Permeabilidad
- Permeability
- Sistema de calefacción
- Heating system.
- Motores
- Motor

Quality

- Heat seal.
- Termosellado
- Cavities and defects.
- Cavidades y defectos
- Leaks.
- Fugas
- Vinyls and windshields.
- Vinilos y parabrisas

R&D

- Design based on thermal distribution.
- Temperature-deformation relationship.
- Performance.
- High speed.

Maintenance

- Critical equipment.

Production

- Welding.
- Continuous control.
